

<sup>1</sup>P2PU Extension Development Course  
Week Three - The Build System and Extension Development Videos

**Introduction**

I have just uploaded a number of videos on the Mozilla build system and extension development. The videos also include how to debug the Firefox browser and extensions.

**The Videos:** Pay attention to the tools mentioned in these videos. With aid of URLs published in the previous notes, the curriculum page and these videos, you now have all you need to develop your first extension.

The videos, which are available at <http://bit.ly/byiNH4>, are the followings.

- The Mozilla Build System
- Mozilla Firefox Extensions
- Reading Code by Benjamin Smedberg
- Creating an XPCOM by Benjamin Smedberg
- An Extension Writing Tutorial
- SeaMonkey BrownBag Training Series (A directory)
- Debugging by Vladimir Vukićević

**Acknowledgements:** Many thanks to the Mozilla Corporation, its developers and the Seneca College CDOT members for making these videos available online.
